### Intel's Product No-code Cloud Deployment

## Overview

user experience. This project heavily used IaaS provider's developer API integration. This work was funded by IntelCapital

- Design an internal multi-tenant solution to automate Intel's cloud deployments across multiple cloud service providers. Techwards developed a rich drag-&-drop UI to create and automate deployment models to give the end users a no-code

ioCommit Sidekick for Meetings https://iocommit.com/

## Overview

Designed some components of ioCommit from proof-of-concept to delivering MVP for their product "Sidekick for Meeting". The product involved extracting tasks from online meetings on MS Teams and assigning them to participants. Development involved implementation of an MS Teams application

### My role as ui/ux designer in each phase

#### Added Tag in dropdown to make more user friendly User can easly find tags Dont need to remember or type tag

Search here	Search here	
-------------	-------------	--

The end-user types `new` dropdown appears with new values corresponding to `new`

new	
New Hampshire	TAGS
Newioroov	Project
New jersey	Client
New Mexico	Some Other
New York	

User select value from the dropdown `New Hampshire it will show with tag assigned

user can choose a different tag of here with a click

> Client New Hampshire	
New Hampshire	TAGS
Newsienees	Project
New jersey	Client
New Mexico	Some Other
New York	

This is an example of how a user cloud easily put two different tags value together

> Client New Hampshire >Project	New Mexico
New Hampshire	TAGS
New jersey	Project Client
New Mexico	Some Other
New York	

#### If value not found user can create new

new	
Not found add this ? Select tag which do you want to add	TAGS O Project O Client O Some Oth

Added Show more button when recipients more the 1

her

### Thank You
